

Assignment 01

Create a student table

Columns list:

1. **student_id** – A unique identifier for each student, automatically generated.
2. **first_name** – The student's first name, ensuring it is always provided.
3. **last_name** – The student's last name, also mandatory.
4. **email** - Ensures that no two students have the same email.
5. **date_of_birth** – Stores the student's birth date, mandatory.
6. **gender** – Can be restricted to values like ('Male', 'Female', 'Other').
7. **phone_number** – Stores the student's contact number, ensuring uniqueness.
8. **enrollment_date** – Automatically records when a student enrolls.
9. **gpa** – Stores the student's GPA, ensuring it's between 0 and 4
10. **status** – Indicates if the student is 'Active', 'Graduated', or 'Dropped Out'.
